

*...Your promise, our packaging*

# 1- and 2- loop FIBCs

## Filling

- Flexible bags allow a smooth and quick filling

## Handling

- 1 or 2 operators can handle the FIBCs easily
- Handling up to 6 one-loop FIBCs at one time by an appropriate forklift/spreader
- Dust-free and safe working environment
- Easy partial discharge

## Transportation

- Suitable for sea, rail and road transport
- Optimal loading minimizes transportations costs
- Eliminates need for container cleaning
- Effective loading / unloading and stacking
- Available with clear printing for immediate identification

## Storage

- Multi-layer stackability
- Optimized use of high storage space
- U.V.-stability for outdoor storage

One - and two - loop FIBCs are designed to provide a complete solution for effective and environmental-friendly filling, handling, transporting and storing of your bulk materials. Zakkencentrale's FIBCs have many features/advantages, due to which your logistics can be further optimized.

Zakkencentrale FIBCs can be stacked easily, with or without pallets.

Two FIBCs can be moved using the standard forks of a forklift truck.

Appropriate forklift/spreaders are available to move several FIBCs in one go.

Zakkencentrale supplies practical equipment to hoist up to 12 FIBCs in one go.

# Portabulk FIBCs

Our Portabulk specifications are independently tested and are certified for conformity with stringent EFIBCA and BS6382 performance standards. All FIBCs are manufactured under ISO 9001 quality conditions including tensile strength testing. Furthermore all of our UN-bags are produced and tested according to the rules of the ADR and RID.

Zakkentrale 1- and 2 – loop FIBCs are available in many different types and also according to customer request. All FIBCs have the requested safety label. Available with one or more document holder. Printing of company logo (in one or more colours) is optional.

*... Your promise, our packaging*

Production under strict control.

An effective loading of trucks, trains and ships is possible with the Portabulk FIBC.

FIBCs are not only the ideal solution for transport, but also for storage during a short or long period of time.
